

## Get to know yourself and the Netherlands!

### Do you have a strong drive to develop yourself?

CheckMark's **Analist Development Program** (ADP) offers you the chance to develop yourself to a professional "pro" level, within international companies in the Netherlands. Companies with large R&D departments and high-tech facilities are waiting for you! In the past years there has been a decrease in good laboratory personnel and researchers in the Netherlands. CheckMark specifically recruits graduated students with Chemistry or Life Science background from Serbia, since 2007. We can offer you a once in a lifetime opportunity through the ADP!

### "Career program for Chemistry and Life Science graduates!"

The ADP is a career program for starters with an education in chemistry & life science. The ADP looks like speed dating: in a period of 36 months, you will work for three different laboratories !

Interested in the experiences of Maja, Milica, Marija, Anna and Andrijana? Check our website and be convinced!

# Analyst Development Program

CheckMark is legally represented in Serbia by the **CheckMark Ger van Meel Foundation**. The aim of the foundation is to encourage talented students in Serbia and to help with the improvement of the academic quality of the University. In 2007 our colleague Ger van Meel (1957 – 2008) made the first contacts in Serbia. He wanted to give Serbian talent a chance in the Netherlands.

Every year we reward a student from Serbia with the "Ger van Meel Award" and a prize of €500,- for his or her thesis. The foundation also financially supports talented chemistry & life science students with a monthly scholarship of €200,- during their last year. The foundation also tries to acquire high-tech equipment which is made available to students of the University.

Career Program offers graduates:

- ✓ 3 years in the Netherlands
- ✓ 3 large international companies
- ✓ 3 different experiences in a high-tech lab
- ✓ Competitive salary
- ✓ Technical and management training

CheckMark arranges working permits and housing
